

"Buckeye" Folding Saw Vise

The J. D. Foote Foundry Co., Fredericktown, Ohio, are manufacturers of the "Buckeye" Saw Vise, illustrated. It is made of malleable iron throughout, being very strong and

"BUCKEYE" FOLDING SAW VISE, OPEN

light. It folds compactly and occupies but little room in a tool box. It can be attached or detached without screwing or clamping. The jaws are 14 inches long, open and close

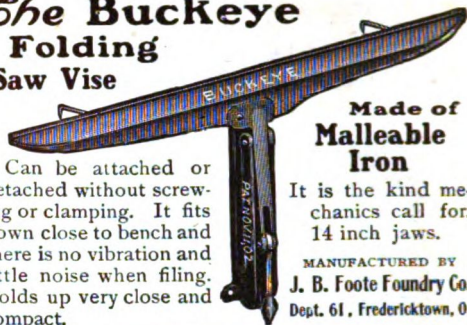

FOLDING SAW VISE, CLOSED

instantly, being separated by a lever which holds the saw tight to prevent any slipping or chattering. The retail price affords more than the usual profit to the dealer.

The Buckeye Folding Saw Vise

Can be attached or detached without screwing or clamping. It fits down close to bench and there is no vibration and little noise when filing. Folds up very close and compact.
